Professional Summary

Analytical and detail-oriented Business & Data Analyst (Fresher) with a strong foundation in Python, SQL, and Excel. Skilled in data cleaning, transformation, and visualization to derive meaningful business insights. Eager to contribute to data-driven decision-making processes and business problem-solving. Currently learning Power BI and Tableau to enhance analytical reporting and dashboarding capabilities.

Technical Skills

Programming & Analysis: Python (Pandas, NumPy), SQL, Excel, Data Visualization (Matplotlib, Seaborn)

Databases: MySQL, PostgreSQL, MongoDB

Learning: Power BI, Tableau

Tools: Git, GitHub, Jupyter Notebook, Google Sheets

Projects

- Job Portal Data Analysis – Python, Django, PostgreSQL, Excel (May 2025)
 - Extracted and analyzed job application data to identify top categories and job seeker trends.
 - Optimized database queries for faster data retrieval and reporting.
 - Presented key findings to improve candidate matching by 25%.
- Blog API Insights Dashboard – Django REST Framework, MySQL (Aug 2024)
 - Designed API endpoints to collect data for post engagement and readership analysis.
 - Created data reports to visualize user activity and improve content performance.
- Hand Gesture Recognition Data Study – Python, OpenCV, MediaPipe (Jan 2024)
 - Collected real-time gesture data and analyzed accuracy metrics.
 - Improved model performance using data preprocessing and pattern recognition techniques.

Education

MCA – Shivaji University, Kolhapur (Apr 2024)

B.Sc. Computer Science – Mahavir Mahavidyalaya, Kolhapur (Mar 2021)

Certifications & Training

- Python Full Stack Developer – Scholar Logic Institute

Additional Skills

- Strong analytical and problem-solving mindset
- Effective communication and teamwork
- Business process understanding and documentation
- Keen interest in data-driven decision-making
